CO-SECUR *Glossary*

Security

'the condition of being protected from or not exposed to danger; a feeling of safety or freedom from or absence of danger'
It is a basic right for citizens that must be protected
Security is the cornerstone of a stable and prosperous society

CO-SECUR *Glossary*

Safety

Safety focuses on protection against accidental or unintentional risks. **Safety refers to conditions of well-being and prevention of harm in everyday situations.** Its focus usually includes regulatory measures, emergency protocols and safety standards in infrastructure and products.

CO-SECUR *Glossary*

Social Innovation in Security (SIS)

Practices and processes involving social, economic, technological, governance and/or policy innovations based on **human needs to improve people's security**. These solutions must be **innovative, transferable, and scalable**, and must be co-created through **participatory processes** and from a multidisciplinary perspective
